

Education

Georgia Institute of Technology – *Master of Science in Computer Science*

Expected 2027

Bushnell University – *Bachelor of Science in Computer Science*

Graduated 2025

Experience

Junior Machine Learning Engineer, Highwater Labs, Remote

Apr 2025 – Oct 2025

- Leveraged Python, PyTorch, Hugging Face, Docker, and FastAPI to engineer an end-to-end LLM training pipeline to automate tasks and streamline work for enterprises.
- Implemented techniques like Low-Rank-Adaptation and Direct-Preference-Optimization to both streamline fine-tuning and to incorporate user feedback into training to reduce training time, GPU usage and improve ML outputs with customer preferences.
- Used Cloud services like GCP and Azure to set up Virtual Machine Instances, Prototype ML techniques, track tasks, and manage Git repositories.

Data Science Intern, Bushnell University, OR

Aug 2024 – Jan 2025

- Utilized Python frameworks like Sci-kit Learn & Tensor Flow to analyze past university data to forecast student performance helping identify at-risk students and guiding strategies for decision makers.
- Used Matplotlib and Seaborn for data visualization to provide clear insights for university executives to easily explain concepts.
- Applied NumPy and Pandas to clean, structure, and engineer features from a messy dataset to improve data quality for model training and evaluation.
- Leveraged Keras and Optuna to tune hyperparameters driving higher model accuracy.

IT Technician, Bushnell University, OR

Jan 2022 – Dec 2024

- Fixed issues across Azure, Power BI, Microsoft 365, and campus database systems, ensuring reliable access to tools and information for staff, faculty, and executives.
- Trained new student Helpdesk staff on core IT systems, troubleshooting practices, technical communication, and customer support.
- Used Excel and Power Automate to track hardware and software inventory to improve accuracy and reduce repetitive manual work.
